R5V08 Highlight – CHKRES program

With release R5V08 of the PFW Business System, you are now able to send the results of the CHKRES command as an email message. With this email option you can set up CHKRES as a job schedule entry to run before database reorganize is to start and notify up to 10 email addresses if there are any active jobs that need to be ended.

Following is an example of running the CHKRES command from a command line and pressing F4 to specify the output method – either display, message queue, or email.

```
Check For Abnormal EoJ's (CHKRES)

Type choices, press Enter.

Specify workstation to check . . . *ALL           Character value
Specify output device/method . . > *EMAIL       *DISPLAY, *MSGQ, *EMAIL
Specify email addresses . . . . johnsmith@tractor.com

F24=More keys
```

Create a Job Schedule Entry using the WRKJOBSCDE command to run the CHKRES command on a daily basis just before database reorganize is scheduled to run. In the following example, CHKRES will be run at 10:45 pm Monday to Friday, just before database reorganize is to start at 11:00 pm. If any jobs are found by the CHKRES command, then an email message will be sent to johnsmith@tractor.com.

```
