## Effective in R6V03:

### Enhancements made to base and option codes in PFW's IntelliDealer

Several exciting enhancements have been made to base and option codes in PFW IntelliDealer for the next system release, R6V03.

#### Base Profile (Fig. 1)

- Base code length is increased from 8 to 20 characters
- Base code description is increased from 20 to 50 characters in the IntelliDealer Base Profile
- Base code cost field is added to the IntelliDealer Base Profile—this enhancement will allow base code costs to be loaded on an equipment purchase order in the PFW Purchase Order system
- Miscellaneous base codes are identified by a separate “Miscellaneous” field (Fig. 2)—prior to R6V03, miscellaneous base codes were identified by placing a “?” in the last position of the description field. This change is also effective in the green screen's Base/Option Maintenance.

#### Option Profile (Fig. 3)

- Option code length is increased from 8 to 20 characters
- Option code description is increased from 20 to 50 characters in the IntelliDealer Option Profile
- Option code cost field is added to IntelliDealer Option Profile—this enhancement allows option code costs to be loaded on an equipment purchase order in the PFW Purchase Order system
- Miscellaneous option codes are identified by a separate “Miscellaneous” field (Fig. 4)—prior to R6V03, miscellaneous option codes were identified by placing a “?” in the last position of the description field. This change is also effective in the green screen's Base/Option Maintenance.
