Effective in R6V02:

Parts Invoicing in IntelliDealer

Now you can invoice parts in IntelliDealer just like Sales Orders in the legacy Dealership Management system, but IntelliDealer parts invoicing offers many additional features. IntelliDealer Parts Invoicing has drop-down or search capabilities on many fields that are not available in the legacy system and much more information is displayed on the Parts Invoicing Header screen. In fact, dealers who are using parts invoicing have noted that the improved searching capabilities, faster requisition processing, and the ability to view many more lines on the screen are the significant benefits of using IntelliDealer parts invoicing.

Fig. 1

Figure 1 shows the Parts Invoicing Header screen. Notice that stock numbers and ship-to addresses are searchable. Also, the Total A/R amount is hyperlinked to allow the user to view current details on the customer's account.

Figure 2 shows the Parts Invoicing Details screen. Many of the data elements are readily viewable—in the legacy system, the alternate view function in Sales Orders was required to view these elements. Many hyperlinks exist on this screen to help make relevant parts information easily accessible. For example, parts availability details can be viewed by clicking on the *OH* (on hand) quantity and on order details can be viewed by clicking on the *OO* (on order) amount.

Many additional features can be accessed by clicking the various buttons at the bottom of the screen. For example, clicking the *Purchase Order* button brings up the Create Purchase Order screen (Fig. 3), allowing purchase orders to be easily created. The *Import* button allows parts lists or PC files to be imported.

These highlights are just a few examples of the many exciting features now available in IntelliDealer Parts Invoicing. For more information on this software feature and others, contact PFW Client Services at (519) 474-3700, or e-mail support@pfw.com.
