Part History Now Shows On Hand

The Net On Hand field on the Part History window has been replaced by On Hand; the system will work from the current on hand and work backwards to show what the on hand was after each receipt or sale.

Force a Lost Sale To Remove a Part

In Figure 3, security switch "Force Lost Sale Code on Deleted Line" has been added to System #823: Product Support » Parts Invoicing that will force the user to record a lost sale in order to remove a part from an invoice. As shown in Figure 4, when the switch is activated and a valid part is added to the screen, the screen will re-display with the part number as an output only. The user must use cash code 4 (Lost Sale) to remove the part from the invoice.
