PFW IntelliDealer Management Central

EQUIPMENT – Inventory control can be improved with equipment data such as equipment profile, sales results, and lost sales statistics—at your immediate disposal.

PARTS – Instant access to critical parts data such as historical sales information, parts orders outstanding, and inventory analysis can help managers make informed decisions about parts needs in the dealership, as well as give the ability to forecast more accurately.

PFW Traffic
Co-ordinate and trace equipment movement through access to a wide range of integrated customer, equipment and delivery information—all within a system that automatically maintains data integrity.

PFW eServices
PFW eServices allows you to extend your dealership's services via the Internet. For your customers' convenience, eServices offers an around-the-clock ability to electronically access their account and equipment information, perform service scheduling, order parts, and print out copies of individual invoices.

Wireless Inventory Control
EQUIPMENT – PFW's Wireless Equipment Inventory Control is a browser-based application that allows you real-time access to important equipment inventory data stored in the PFW Dealership Management System—through the mobility and convenience offered by your wireless network.

PARTS – PFW's Wireless Parts Inventory Control application suite is browser-based software that allows you to access critical parts inventory data in the PFW Dealership Management System. It's real-time information you can access through the mobility offered by your wireless network.

PFW Software Interfaces
As a means to increase efficiency and save time, PFW interfaces form an electronic bridge between the PFW database and your vendor-provided data solutions. Several interfaces are available to transfer parts order information and parts lists, as well as maintain equipment data.

PFW PartFinder
With nearly 2 million parts representing thousands of different vendor lines, PFW PartFinder is the best tool available to find and sell used, discontinued, or specialty equipment parts.
