

ADP Network Solutions

Call Connect

Phone, data and Internet all on one circuit

Put your trust in the leader in dealership phone systems.

Since 2002, ipNetworked Services, Inc. (ipNS), a subsidiary of ADP, has been providing voice communication solutions that include equipment, support and maintenance. Currently over 73,000 users utilize ipNS Network Phone. Call Connect is backed by ipNS' support team, providing you a virtually worry-free economical service.

Powered By

By combining our two companies, PFW and ADP can now offer the largest and most comprehensive selection of products and services to equipment dealers worldwide. These cost-effective, leading-edge solutions have been developed by ADP to help grow your dealership business. Backed by ADP, you can expect the same quality and reliability you have come to expect from PFW.

Call Connect provides an alternative to your current local and long distance provider and allows your dealership to make and receive calls using a high-capacity T1 line and your existing phone system.

Instead of having separate circuits for your data and Internet, all three (**voice, data and Internet**) can be supported by Call Connect. Why pay for separate voice and data circuits? Call Connect provides dial tone and Internet connectivity, plus it supports secure data connections to manufacturers and ADP's ASP data center.

Benefits of Call Connect

- Increased capacity
- A simple easy-to-understand monthly bill
- An accurate month-to-month phone budget with a fixed amount for local and long distance calls
- Caller ID and 911 connectivity
- Maintain your existing phone numbers

With virtually unlimited* local and long distance calling, there's no more guessing what your phone expenses will be because Call Connect is billed at the same pre-determined amount each month. You don't have to worry about Call Connect interfering with your Internet connection, as the dedicated T1 line ensures your e-mail and Internet connections are not impacted.

*ipNS studies indicate that dealerships average 500 minutes of usage per phone each month. The Call Connect plan provides 1,500 minutes of usage per phone, pooled by the total number of phones at the site. Additional fees will apply if the plan's 1,500 usage minutes per phone are used up.

More than Just Dial Tone

Call Connect is the only phone service offered by a DMS provider; it also provides a platform for delivering hosted applications. By taking the applications and the associated computer hardware out of your dealership, ipNS helps you concentrate on your main focus: selling equipment, parts and service.
