

PFW IntelliDealerASP **GetWired™**

GetWired Provides Protected Access to the Internet

PFW's alliance with ADP will allow Dealers using PFW IntelliDealer to choose the option of having their Dealership Management System hosted remotely in an Application Service Provider (ASP) environment at ADP's state-of-the-art Data Centers. ADP provides secure and reliable IntelliDealerASP access and eliminates headaches associated with daily system maintenance and network management. Our ASP hosting solution is flexible and scalable to fit any size dealership... from a single-point location with a small number of users to a large, multi-site Dealer group.

As part of the IntelliDealerASP infrastructure, **GetWired** includes business-grade Internet connections, powerful security management tools and responsive technical support.

Here's what **GetWired** provides your dealership:

- Network security as well as customer and financial data protection
- Internet connectivity and ISP service options
- State-of-the-art Cisco PIX firewall protection and monitoring
- Virtual Private Network (VPN) directly to ADP for support and efficient application delivery
- Internet integration with IntelliDealerASP

The flexibility of **GetWired** allows you to:

- Access IntelliDealerASP, the internet and manufacturers' application servers from a single PC
- Meet manufacturers' internet communications and data exchange requirements
- Connect to manufacturers' websites and applications
- Utilize customer and equipment data collected by IntelliDealerASP in e-business applications
- Establish an internet-based email electronic messaging system
- Select an business-grade Internet Service Provider (ISP) that meets your specific needs
