Request More Information

If you would like more information, please visit www.pfw.com or contact our Sales Team at (519) 474-3300 ext. 230 or sales@pfw.com.

PFW MobileTech is a Windows-based application for laptops or handheld devices designed to accurately and electronically record time for field service work orders.

Equipped with a Windows Mobile device or laptop running MobileTech, field service technicians can view or record time to assigned work orders. With the ability to sense network connectivity, MobileTech synchronizes directly with PFW IntelliDealer's Service Work Orders on demand.

IntelliDealer work orders marked as requiring a "Service Call" are synchronized to a technician's mobile device when connectivity to IntelliDealer exists. After synchronization is complete, a condensed version of all work orders assigned to the technician at the time of synchronization is available to the technician from MobileTech – without the need for a connection to PFW IntelliDealer. MobileTech displays the customer name and description for all assigned work orders. The option to display extended details such as address, work order number and customer contact information is also available. To "sign on" to a work order, the technician selects the work order and segment of work from within MobileTech – time is recorded to the selected segment until the technician "logs off" the segment.

MobileTech Eliminates Time Spent on Manual Data Entry

Time recorded in the field is automatically posted back to work orders when MobileTech is synchronized with PFW IntelliDealer. Not only is time saved, but the potential of keying errors is also greatly reduced with MobileTech because of its automated nature. With PFW MobileTech, you can eliminate the manual tracking and recording of time spent completing field service work orders.

What's Best for You?

MobileTech Laptop Edition

An ideal solution for Dealers who have already invested in laptop computers and want to take advantage of their existing hardware.

MobileTech Handheld Edition

The **Motorola MC35** is a little device with big business functionality, with the combined power of a mobile phone notebook, camera and barcode scanner in one durable package.
